PROFILE SUMMARY

Innovative Computer Science Engineering student specializing in IoT with hands-on experience in real-world applications. Proficient in Python, OOP, and MySQL, with a passion for solving complex problems through technology. Skilled in IoT project development and system optimization, and committed to continuous learning and collaboration.

EDUCATION

- 2022 - 2026
CHANDIGARH UNIVERSITY
 - Bachelors of Engineering-Computer Science and engineering with IOT
- 2019 - 2021
ST.KAREN'S HIGH SCHOOL
 - Senior Secondary Education
 - Secondary Education

SKILLS

- Python
- C++
- MySQL
- MS Office
- OOPS

INTERPERSONAL SKILLS

- Team Collaboration
- Time Management
- Design Thinking

LANGUAGES

- English
- Hindi

PROJECTS

CHAT APPLICATION 2024

MERN Stack

- Developed a real-time chat application using the MERN stack (MongoDB, Express, React, Node.js) to enable seamless user communication.
- Implemented features like user authentication, real-time messaging with Socket.io, and responsive UI for a smooth user experience.
- Ensured scalable backend architecture, optimizing database queries and enhancing application performance.

SPEED DETECTOR SYSTEM 2023

IOT

- Designed a speed detector system using Arduino and sensors to measure the speed of moving objects accurately.
- Programmed the system to display speed data in real-time, ensuring reliable detection for various applications.
- Integrated data logging features for speed analysis, enhancing the system's utility in monitoring and reporting.

CERTIFICATIONS

- Introduction to Internet of Things, NPTEL
- Oracle cloud infrastructure 2024 Generative AI, Oracle
- Python(Basic), HackerRank
